## **Oil Sands Industry Continues to Closely Monitor COVID-19** ***Precautionary measures being implemented to reduce potential exposure***

*Fort McMurray* – The Oil Sands Community Alliance (OSCA) and its member companies are actively monitoring the coronavirus (COVID-19) situation across the country and are in regular communication with Alberta Health Services.

Our member companies have robust pandemic procedures as part of their respective emergency response plans as mandated by Occupational Health and Safety.

Many member companies have taken extra precautionary measures to reduce potential exposure to COVID-19 including:

- Implementing systems and procedures to monitor and manage those employees and contractors who have travelled to at-risk countries,
- Cancelling any non-essential business travel to at-risk countries,
- Encouraging employees to change any personal travel plans to at-risk countries, and
- Reviewing contingency plans to maintain business continuity.

OSCA will continue to coordinate industry efforts with provincial and municipal agencies to monitor the health of the local workforce.
